

Contractor Dashboard

1. Edit company name formatting on contractor dashboard to match contractor profile. Have profile image and change font style.
2. Mobile formatting
 - a. Move dashboard, account details, logout to navigation
 - b. Remove sorting feature
 - c. Reduce size of "New Leads", "Awarded" etc. buttons.

3. Add graph for Leads so they can track how many total leads they have received over time.

- Air Conditioning services on Dallas, TX, USA for Md. Abdul Hakim
- Air Conditioning services on Frisco, TX, USA for Md. Abdul Hakim

Search as I move the map

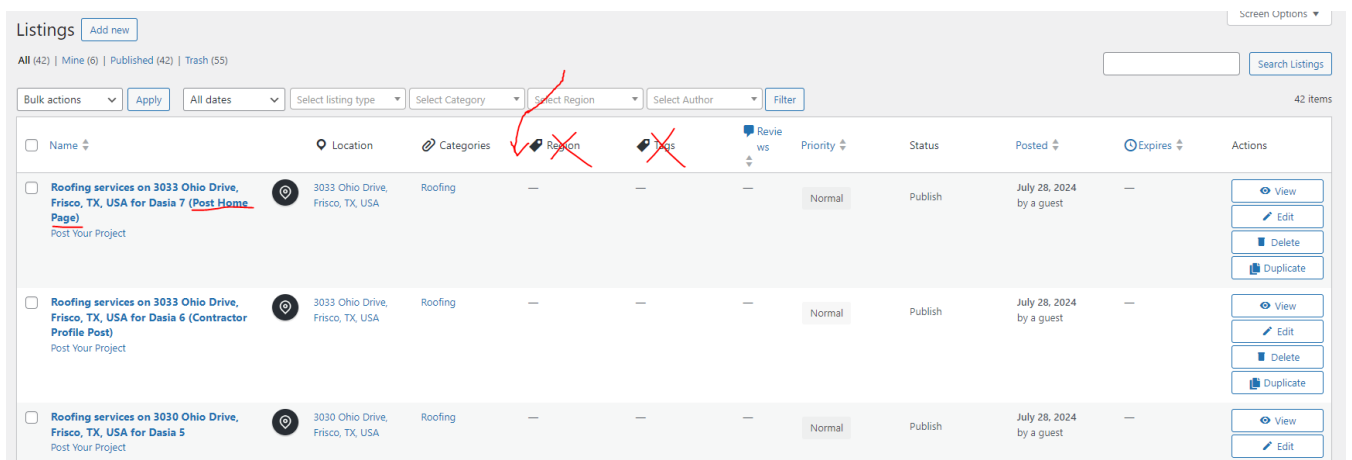

1. When "Post Your Project" is clicked, just have pop up display like it does on home page. Don't show all these project listings.

Contractor Profile

1. Change “Description” to “About Us”
2. Change “Amenities” to “Additional Information”
3. Change “Contact” to “Get Quote”
4. Add Reviews functionality (Was part of template should be easy to add)
5. Make sure all information that is filled out in “Account Details” is displayed on profile. For example I added website URL and it does not show on profile page. Also added social media link and it does not display either.

Admin

1. I want to be able to see which contractors were contacted about project. So if it was a direct post to a contractor then just show that contractor. But if it was a post from homepage were it goes out to top 3 contractors list which 3 contractors were contacted.
2. Remove Region and Tags columns for more space since those don't get used.
